ProCharger Tuner Kits

The HO Intercooled and Stage II Intercooled Tuner Kits omit tuning and fuel injectors, but are otherwise identical to the systems.

ProCharger has expanded intercooled supercharger offerings for the popular 2004-08 Ford F-150 trucks and 2007-08 SUVs. An all new HO Intercooled System features a shared drive for the ProCharger P-1SC-1 supercharger, while the Stage II Intercooled System utilized a heavy-duty, dedicated supercharger drive and larger, 3-core air-to-air intercooler. Both ProCharger systems produce 60-65% power gains from 8-9 psi of intercooled boost on otherwise stock engines while still running high quality pump gas. HO Intercooled and Stage II Intercooled Tuner Kits are also available.
