2010 CAMARO SS

STREET/STRIP CUSTOMER PERFORMANCE PROFILES

When it comes to adding big, reliable power to late-model LS engines, ProCharger dominates. With the largest, most reliable power gains on pump gas, ProCharger-powered 2010 Camaros dominate both on the street and on the strip.

In fact, the first 2010 Camaro SS into the 9's is ProCharger-equipped. Backed by the strength and service of the industry leader, ProCharger is The ULTIMATE Power Adder® for the new Camaro SS.

HOT ROD Magazine, March 2010 issue: Starting with a 2010 Camaro SS, Kevin Morgan's Trans Am Concept relies on an intercooled ProCharger supercharger system under the hood to match it's head-turning exterior.

GM High-Tech Performance, March 2010 issue: Starting with a brand new 2010 Camaro SS, David Caine went with a ProCharger Cog Race kit and an intercooled ProCharger F-1C supercharger on a built LS engine to produce 1,048 HP!
