

Proven ProCharger Intercooled System for
POLARIS RZR XP™/XP4™

The **ULTIMATE** Power Adder for the 2011-2012 Polaris RZR XP 900

Polaris + ProCharger = even more extreme performance!

An Intercooled ProCharger system delivers industry leading performance, durability and ease of installation for your Polaris RZR XP. Running just 6 psi of intercooled boost, with the coolest charge temperatures available, ProCharger produces a 3.5 second improvement in 20-70 mph performance and a 45%+ increase in power. Unlike other forced induction offerings, this is a true bolt on, designed to run pump gas with stock compression and no engine modifications.

- 6 psi, 45-50% Power Gain
- 3.5 Second improvement in 20-70 mph performance
- 3.5 Second 0-40 mph

The ProCharger system is easily installed in 4-6 hours with simple hand tools, and features a neat, clean installation and OEM appearance. Instant power is produced, with no turbo lag and no exhaust heat transfer. This design works well with other bolt-ons such as exhaust, and ProCharger's patented self-contained oiling means no risk of engine oil contamination. Cooler charge air temperatures produce not only more power and better engine longevity, but also consistent, repeatable performance - even under extremely demanding conditions. This innovative new supercharger system is now available from ProCharger, the world's leading aftermarket forced induction company.

- In addition to the ProCharger A-1, the world's most compact, self-contained gear driven supercharger, a highly-effective air-to-air intercooler is integrated into the system design as well.
- Cooler air = best-in-class power and engine longevity
- Supercharger systems also provide outstanding "altitude compensation".
- Designed, manufactured and serviced in the USA

Industry Leading
BOLT ON POWER GAIN!

Proven Products from the Industry Leader

RZR XP 900

Intercooled Supercharger System
 MSRP: \$5,495

Intercooled Supercharger Tuner Kit
 MSRP: \$5,199

(Excludes fuel injectors and programmer)

RZR XP 4 900

Intercooled Supercharger System
 MSRP: \$5,599

Intercooled Supercharger Tuner Kit
 MSRP: \$5,299

(Excludes fuel injectors and programmer)
